chichibu ichiro's malt & grain world whisky 64.

kuramoto ice from japan! 4. per sphere
founded in 1923, kuramoto ice developed junpyo
("pure ice" in japanese) made by slowly freezing
drinking water at around 14° F while agitating it for
over 48 hours. characterized by its high transparency,
hardness & slow melting properties. with the least surface
area of all shapes, spherical ice is slower to melt &
dilute the flavors of a wellcrafted cocktail—ideal for those
who enjoy whiskey on the rocks. we encourage you
to take your sphere home to re-freeze & re-use.
